

Tag Rack

The Tag Rack is designed to store and protect HALO® infant tags and RoamAlert® wrist tags. The rack helps ensure that tags are cycled on a first-in first-out basis to maximize battery life, and prevents tag loss that can occur from misplacing tags.

The metal Tag Rack cabinet is wall-mountable and easily cleaned. The Tag Rack door is left-hand opening and can be fitted with an optional lock (not supplied) for additional security. Labels are provided to record tag serial numbers with specific Tag Rack locations.

For infant tags, the Tag Rack also helps to extend battery life. When properly stored in the cabinet, the tag's Off-Body sensor is disabled so that the tags do not emit Off-Body messages, thus extending the tag's battery life and reducing the potential for nuisance alarms caused by inappropriate storage of tags.

Note: The Tag Rack should be mounted away from all Door Controllers to prevent tags from being detected when the Tag Rack door is opened.

Tag Rack Specifications	
Models	AGETR01-000: RoamAlert tags and flat infant tags AGETR02-000: curved infant tags
Size	11.25 x 11.25 x 3.5" (28.6 x 28.6 x 8.9 cm)
Color	Beige
Capacity	Stores 42 tags

Features

- Preserves tag battery life and reduces nuisance alarms
- Stores up to 42 tags
- Two models available to accommodate flat infant tags and RoamAlert tags; and curved infant tags
